

Incubator Aero-Sled with Elevating Trolley

The aeromedical incubator Aero-Sled is E.A.S.A. - European Aviation Safety Agency/CAA certified and cleverly designed to be compact yet fully equipped for infant safety and comfort throughout the journey by air and road. All equipment on the trolley is highly visible and easily accessible.

The elevating trolley system is designed for smooth and efficient loading in to and out of fixed wing and rotary aircraft. In accordance with Health & Safety guidelines the elevating trolley eliminates any unnecessary lifting or manual handling by ambulance or hospital personnel.

- Lightweight
- Trolley base compatible with UK ambulance trolley locks
- Ergonomic design
- Equipment easily accessible
- Compact
- E.A.S.A./CAA certificated
